

ABSTRACT OF THE DISCLOSURE

The present invention relates a composition promoting the growth, and increasing preservative capability of human body, animals and plants. The composition of the present invention maximizes physiological activity of human body, animals and plants. In addition, the present invention relates a producing method of the composition composed of the following steps: 1) preparing a composition containing kaoline (white soil) 30-40wt%, potassium sulfate 15.0-20.0wt%, sodium sulfate 13.0-17.0wt%, feldspar 12.0-16.0wt%, talc 12.0-16.0% and ferric oxide 0.5-1.5wt%; and 2) mixing the above-mentioned composition using a compressed molding method; and 3) heating the mixed composition at 1000-1300°C.

The composition of the present invention can be used in whole fields of industries, and will cause the original changes in the field of industrial matters, and promote the welfare of human beings such as improvement of health and life of human.
